

LED chandeliers

LED chandeliers

At Okholm Lighting A/S you can get customized LED chandeliers according to your needs and wishes. Thanks to our flexible lighting solutions, you can choose which size, surface, function etc. you want.

You can select between different colour temperatures - from 1400 Kelvin to 12000 Kelvin. In addition, you can choose the shielding of the chandelier - it can be prismatic, diffuse or opal. There are many choices to be made - among others the lumen package and effects, so if you need advice, please feel free to contact us.

On this page you can see various examples of LED chandeliers manufactured by Okholm Lighting.
